

Exercise - Pomodoro Timer

Goals

Create a [Pomodoro timer](#). The pomodoro timer will follow the classic pattern of 4 rounds of 25 minutes with a 3-5 minute break and then after 4 rounds a break of 15-30 minutes.

Assumptions

- The Application is a single user application and information does not need to be shared with anyone else.
- The Developer has full discretion on the user experience and interface.
- The code must be checked in to a public Github repository.

Requirements

#	User Story
1	As a user, I must be able to easily start the timer.
2	As a user, I must be alerted when there is no more time left on the timer.
3	As a user, I may be able to view the remaining time of the timer.

User interaction and design

It is up the discretion of the developer how the user will interact with this application. Potential types of user experiences could be an Alexa Skill, Web Page, Mobile Application, API, or Console Application.

Questions

Below is a list of questions to be addressed as a result of this requirements document:
